FULL-STACK DEVELOPER & CYBERSECURITY SPECIALIST

Secure Web Architecture | Advanced Threat Research | Infrastructure Defense

Professional Summary: Results-driven Full-Stack Developer and Cybersecurity Specialist focused on building secure, scalable web applications and defending enterprise infrastructures. Proficient in Django, PHP, and Angular, with specialized expertise in **Reverse Engineering**, **Malware Analysis**, and implementing advanced **Cryptographic algorithms (Encryption, Decryption, and Hashing)**.

CORE COMPETENCIES

- **Cybersecurity & Threat Research:** Reverse Engineering, Malware Analysis, SOC Essentials, SIEM (Incident Detection), Vulnerability Management, and Incident Response.
 - **Cryptography & Offensive Security:** Advanced **Encryption/Decryption** techniques, **Hashing algorithms**, Active Directory Hacking, Cloud Hacking, and Source Code Review.
 - **Full-Stack Development:** Python (Django, REST Framework), **PHP**, **Angular**, JavaScript, C++, Java, and OOP.
 - **Systems & Infrastructure:** MCSA (Windows Server/AD/GPO), Linux Administration, CCNA concepts, PostgreSQL, MS SQL Server, and Docker.
-

PROFESSIONAL EXPERIENCE & PROJECTS

Amazon Plus Clone (E-commerce Platform) *Lead Full-Stack Developer & HCI Specialist*

- Architected a full-featured e-commerce application using **PHP** and **MySQL**, incorporating secure user authentication and product management .
- Applied **HCI principles** (Visual Organization & Interaction) to optimize usability and navigation flow.
- Implemented a data-driven Admin Dashboard for real-time sales, user management, and product tracking.

Enterprise Infrastructure & Security (SmartTech) *Security Systems Analyst*

- Engineered a centralized Windows Server environment for HR, IT, and Finance using **Active Directory** and **Group Policy (GPO)** .
- Enforced rigorous security policies, including complex password requirements, account lockout policies, and restricted device access .
- Configured granular role-based access controls (RBAC) and secure file server permissions .

Text Encryption Web Application *Developer*

- Built a custom **Django** application specialized in **Encryption** and **Decryption** processes for text data, ensuring secure communication and authentication .

Library Management System *Full-Stack Developer*

- Developed a book management, rental, and sales platform using **Django** and **MS SQL Server** with full CRUD and profit tracking functionality .

Mini Web Applications (RESTful Patterns) *Backend Developer*

- Created a suite of applications focused on **RESTful API** implementation and database relations using **Django** and **PostgreSQL** .

WORK HISTORY & INTERNSHIPS

- **Summer Intern** | CIB Egypt (The Green Leap Program, 2025).
- **Junior Backend Developer Intern** | Various Startup Projects (Django/Python) .
- **Cybersecurity Trainee** | National Telecommunication Institute (NTI) - Ethical Hacking Project .

EDUCATION & CERTIFICATIONS

- **B.S. in Computer Science (Cybersecurity)** | Beni Suef National University (BSNU) - 3rd Year .
- **Accomplishment:** Contestant at **ICPC** (International Collegiate Programming Contest).
- **Key Certifications:** **MCSA** (Windows Server), **CCNA** (Cisco), SOC & Security Analyst Training, and Advanced Pentesting.

TECHNICAL SKILLS & LANGUAGES

- **Tools:** Nmap, Metasploit, Burp Suite, Nessus, Acuntix, Postman, SIEM, Gobuster.
- **Soft Skills:** Analytical Problem Solving, Technical Documentation, Prompt Engineering, and Agile Collaboration.
- **Languages:** Arabic (Native), English (Professional Working Proficiency).
